Cir/2015-16/July Class: III to IX Date: 08/07/2015

Dear Parent,

The school has been hiring the services of Butterfly Fields Educational Initiatives, Gray Matters India and Detailed Assessment to enhance the qualitative and quantitative analysis of the concepts taught at school.

To make learning easy, enriching and enjoyable, Butterfly Fields specifically designs various kinds of activities and experiences for a child to think laterally, gain hands on experience on the underlying concepts or principles taught at school while working in a team.

Gray Matters India (GMI), makes a data-driven school assessment and evidence based analytics with indicators of quality as unbiased metrics to measure the students' performance. Factors such as learning outcomes and teacher observations, are included in this analysis made through the Base Line Exam and the End Line Exam.

Detailed Assessment believes in making a difference in education through personalized learning and ensuring that students learn to understand more with the help of skill based and higher order thinking type of questions customised to the curriculum followed at school.

	Classes	Subjects	Number of Students	Cost per student	Total Cost
BUTTERFLY FIELDS	III to VIII	Science and Math	960	1302.25	12,50,160.00
GRAY MATTERS	III to IX	English, Science, Math, and Logical Reasoning	1112	420.00	4,67,040.00
DETAILED ASSESSMENT	VI to VIII	English, Math and Science	480	1522.00	7,30,560.00

It is our sincere request to refrain your child from being absent during these sessions. The students are intimated about the classes well in advance. While they do get the DIY (Do It Yourself) Kits, they would be missing on the explanation and the fun of working on the model along with the peer group.

Principal
