### **Suggestions:**

- During the initial months the children are taken to the play park to get themselves acquainted to the school premises, but towards the second term they are taken to the ground for sports.
- Oral drilling will be given. Teacher will put an extra effort to concentrate on pronunciation.
- A class test is given to reinforce the topic taught in the class. Students should read the complete lesson as soon as the teacher initiates the lesson to feel less stressed while preparing for the class test.
- We shall look for a good art & craft resource person and will arrange for the extra classes in the evening.
- We are engaging resource person for parenting session; an intimation will be sent with the details and schedule.
- Thank you for the suggestion. The Board has introduced the system of adopting creative skills in the formative activities so as to encourage and motivate the slow learners.
- Students are often encouraged to express themselves both in word and speech to develop their language and communication skills.

### **Concerns:**

- We shall implement special classes before the examinations to reiterate the topics in mathematics for class VII.
- We shall try to adhere to the time line to complete the syllabus.
- The school engages the services of Alumni Association of IIM to conduct the career counselling for the children and parents of class X during the second term.

### **Questions:**

- A five day week session will not be sufficient as we accommodate co-curricular activities along with the curriculum. We generally have a holiday on the second and fourth Saturday of a month.
- We will send the GK text book in advance, but the questions for the GK exam are given both from the text and the general happenings. Students should be proactive and keep themselves updated with the current affairs to score better marks in the GK exam.
